

UA GLASS_{LTD}

For all your bespoke glass requirements

UAGlass_{Ltd} was established in 1997. We are a family based company and are renowned for supplying excellent quality products and providing a warm and friendly service with honest advice.

Over the years we have developed our business by investing in machinery allowing us to manufacture a vast range of glass products in-house. For further information on our products please visit our website www.uaglass.co.uk.

Norfolk's Leading Flat Glass Specialists since 1997

Brought to you by

UAGLASS LTD

Norfolk's Glass Specialists.....

Balustrades

We manufacture glass for balustrades and external balconies, all to your specific requirements.

Balustrade glass can be manufactured in various glass thicknesses from 10mm up to 19mm. All glass for stairs is toughened as standard, with the option of toughened laminated glass if required.

External glass balconies can be manufactured as either standard toughened glass or toughened laminated glass, depending on your requirements.

All glass balustrades or balconies are finished with polished edges and can be drilled for fixings.

We can also provide various fixings for internal glass balustrades in order to install the glass.

Glass Doors and Shower Screens

Glass Shower Doors and Shower Screens are manufactured in 8mm or 10mm toughened safety glass, with polished edges and can have cut outs made for hinges and handles.

We are able to supply all hardware including hinges, handles and channels for installation.

Due to printing limitations the colours shown may vary slightly when compared to the finished glass product.

Mirrors

Mirrors are all made to order to your specific requirements and are available in either 4mm or 6mm thicknesses.

We offer various edge finishes including polished and bevelled edges, and mirrors can be drilled for fixing with screws.

Mirrors can also be fixed using adhesive as an alternative to screws.

We recommend that large mirrors and mirrors being installed in areas of high moisture content, ie. Bathrooms and kitchens, are safety backed.

Mirrors can be used in many applications including splashbacks.

We offer various types of mirror including:

- Silver Mirror
- Bronze Mirror
- Venetian Antique Mirror
- Replica Antique Mirror
- Toughened Mirror (only available in silver)

Glass Shelves and Table Tops

Glass Shelves are available in any thickness from 4mm up to 19mm, and are made to your specific requirements and finished with polished edges.

Protect your furniture with Glass Table tops. The glass comes in various thicknesses from 4 mm up to 19mm and all table tops are made to order to any size or shape and finished with polished edges. We can supply coloured, tinted or clear glass.

We offer competitively priced, high quality, made to measure products, and can work with any design idea, however big or small. We offer both a templating and fitting service covering Norfolk, Suffolk and Cambridge, or alternatively, a supply only service for if you wish to install the glass yourself.
